

MYP Community Project

Bryce Boles and Liberty Ratermann

**NO LITTERING
KEEP YOUR
COMMUNITY
CLEAN**

Goal

- We planned on walking the roads of our city and picking up trash, With this we were planning on making the streets of our city cleaner.
- If we were to clean the streets it would make Cookeville more appealing and maybe even help out the local businesses.
- Even walking our own roads that we live on and pick up trash would help us out one small step at a time.
- If local people were to see that we were picking up trash and disposing of it in the right way they might even get out there and help you out, Which would get it done alot faster.

Research

- We researched what materials we would need and the best place that we could go to pick up trash. We found the places that needed it the most and planned on starting there.
- We researched the best place and decided it would be Cane Creek Park, and our own roads that we live on.
- We then researched where we would take the trash that we collected, which would be the nearest dump or any dumpster.

Taking Action

- Our plan was to go around and pick up trash where it needed it the most.
- The plan changed a little bit from the beginning In ways like where we were going to go and what we were going to use in the process.
- We ended up going to Cane Creek Park and picking up trash there.
- It was a total success, We got an exercise, Showed people that with a little help we can make cookeville a cleaner place, And had fun while doing it.

Reflection

- We learned that if you make time and put in a little bit of effort, you can make a big change. Before you know it, that little bit of effort could start a domino affect and everyone will help out, and you make the community a better place together.
- The most important learning skill would be self-management. We always need to have the correct materials, and we need to use are time wisely and effectively. We also have to be sure to meet all the deadlines.
