

Community Project

By: Payton, Luke, Rowan, and Dalton

Goals:

- Get kids bikes that can't afford them.
- Make a difference in the community
- Get it done by Christmas so kids will have a good Christmas
- Finish this project on time
- Make the kids' lives easier because they now have a way of transportation.

Research

- Researched websites for ideas
 - Looked for other communities that had the same idea we had.
 - Researched on how to fix certain problems we ran into with the bikes
 - Before we had the bike idea we researched other community project ideas
-

Taking Action- Plan

1. Our plan was to get bikes from people who would donate.
2. Then we got tools to fix the bikes.
3. Then we moved them to a working place.
4. After that we all went to the working place to fix the bikes.
5. After we fixed them, our mentor donated to the Angel Tree.
6. Lastly we made a change in the community for the better.

What we learned

We have learned so much through this entire process. We have given back to the community in different way. We have learned that we take the little thing for granted such as being able to have a bike and ride it. All of us now realize that the community is a great place to be able to help people out.
