

Our Community Project

By: Dev Patel, Vansh Shah, and Alex Hadlock

A: Our Goal

Our goal was to go to elementary schools (Capshaw Elementary school in specific) and help teachers keep little kids in control, help them with their homework, and help them learn.

B: Our Research

We went to the main office and asked the man there were Mrs. Paris was. She wasn't there the first time so we just helped a teacher with first graders. The second time we helped them with their snack and played outside with them.

We also emailed Mrs. Paris before we ever even when we went to the school.

C: Our Plan

1. We went to Capshaw.
2. We went to the front office to see where to go.
3. After that, we followed the instructor to the room we were going to be in.
4. After we followed them outside where they ate
5. After the kids were done eating, we played outside with them for 15 min.
6. When recess was over we went to a classroom and played a spelling game to help them study for their spelling test.

D: Our Reflection

It was a good experience. We learned a lot, and we helped kids succeed in school. The most important approach to Learning Skills was Communication because we needed to socialize with the kids to help kids learn. Also, another Approach to Learning Skill was Collaboration.
